How can I buy the product?

Clinifast Tubular bandages are available through NHSSC and are also available on prescription via Drug tariff (FP10) in the community.

Will it perform better than other Tubular Bandages?

Clinifast Tubular bandages performs equally as well as other one way stretch Tubular bandages. They provide effective dressing retention for primary wound dressing.

Will Clinifast Stay Up?

Yes, it is a retention bandage and because it contains elastane it will stay in place.

Is it available on drug tariff?

Yes and it is available in the following sizes:

Red

Green

Blue

Yellow

Beige all 1m, 3m, 5m rolls

On NHSSC, it is Available in Red, Green, Blue, Yellow, and Beige on supply chain in the following sizes.

10m, 1m, 3m, 5m rolls

10m rolls are used mostly in hospitals

Are there washing instructions?

Washing instructions are printed on the instructions for use.
We recommend washing by hand and dry on a radiator or air dry.

Does it shed like other bandages?

Yes but no more than any other tubular bandage.

Does it perform as well as two way stretch Tubular bandages?

Clinifast Tubular bandage offers single stretch and has been the product of choice for dressing retention for a number of years.

The bandages are cost effective dressing retention bandages.

Do any of your Tubular bandages contain latex?

No, our bandages are Latex free.
